REMARKS	[REDACTED]	25X1

1. Prior to April 1950 a barracks installation of several large, multi-story buildings and some stables was located in Kicevo (Y 48/H 35), on the road leading to Prilep. There was no fence around the billeting area. A radio station with four or five steel towers, 7 to 8 meters high, was near the installation.
2. The barracks installation was fully occupied by troops equipped with 75-mm guns and 120-mm mortars. * The horses belonging to the unit were frequently observed to be led to a watering place at a small river flowing about 400 meters behind the drill ground at the installation.
3. [REDACTED] seven brigades of about 200 men each were stationed in the barracks. Each brigade allegedly had guns and heavy mortars attached. *
4. The troops wore grey-green epaulets without piping, and chevrons, apparently insignia of grade. Branch-of-service insignia was worn on the epaulets.
5. Another radio station was under construction on a hill in the center of Kicevo, opposite the railroad station. It consisted of some wooden masts, about 12 meters high. The officers' billets of the post were near this radio station.

* [REDACTED] Comment. The unit is believed to have been an infantry unit.
